It is with great pleasure, I wish to recommend Innovatus systems and their Smart Face App for any existing Attendance systems. MPL has been using the facial recognition technology software from Innovatus for 6 months now and I must say it is a breath of fresh air in the technology field. Due to the recent pandemic, MPL was unable to use the legacy system of Biometric attendance where one needs to put their hands on a terminal to scan their hours. With Smartface from Innovatus, every user uses their smartphone to record their hours. It is easy to use software that requires no additional hardware expense on the Employer or the Employee. Simply add the smart face app on your smartphone and you are on your way to an error-free daily attendance.

Our employees find the app easy to use and user friendly. The payroll personnel are happy with the reporting capabilities of this system. It also has direct integration with any existing Attendance software and Payroll Systems. It is a robust system that can adapt to many environments. It has Geofencing capabilities which allow employees to only register their time when they are physically in the office buildings and saves the company from any malicious entries by employees.

Overall an awesome solution and Kudos to the team at Innovatus in bringing such an awesome technology to the forefront. Wishing everyone at Innovatus all the best and success with all future launches.
